01 PROFILE

I'm a senior front-end developer interested in JavaScript and web technologies.

I am also good at learning new concepts and understanding structures.

02 EMPLOYMENT HISTORY

2016 — 2017

Shiraz

Full-Stack developer at Catiga

Catiga was a commercial complex where I developed accounting and warehousing software on its software development team as a full-stack developer.

2017 — 2018

Shiraz

Full-Stack Developer at BimeMarker

bimeMarket was an active startup in the field of insurance in which I worked as a full-stack developer.

2017 — 2018

Shiraz

Front-end developer at Parse

Parse was a contractor Company who brokered site design projects, and I worked in the technical team as a Front-end Developer.

2018 — 2019

Shiraz

Frontend developer at Jihaat

I did projects that were outsourced by Jihaat. At this time, I became more familiar with SSG and SSR.

2019

Shiraz

CTO at Jihaat

- As a project manager, I became familiar with the Scrum framework.
- I faced team management and project leadership challenges.
- As a Front End internship mentor, I delved deeper than ever.
- Covid 19 helped me a lot in learning the challenges of remote team management.

2020

Leader of Shiraz LUG

As a friend of Linux, free software and a longtime member of ShirazLUG, being a leader in this group feels good.

03 SKILLS

JavaScript

+5 years of experience working with JavaScript
